STACKED MAP

Welcome to PAX!

Some buildings are a little easier to navigate than others, and this one...is one of the others. Honestly, it's not that bad, but there are a few things to keep in mind.

#1. The main entrance is at Broad Street. Grand Hall also works in a pinch, but Broad Street is generally the safe bet.

#2. You can't cross the street on Level 1, so if you're in Level 1 Green and trying to get to Level 1 Gold, you've gotta go up one of the Green Escalators, head up the concourse in front of the Hall, and go back down a Gold Escalator.

#3. In the Convention Center Map, you'll notice levels 3 and 4 aren't (really) on there. Sorry! There's just *so* much PAX, but hopefully this map with the floors "stacked" on top of each other will help?

#4. There are more trees on planet Earth than there are stars in the galaxy. That doesn't really have anything to do with the building, but I had some extra space and I thought it was important you know.

#5. Each escalator will be marked with the color as shown here, so try to remember this color coding. It could prevent you from having to backtrack up escalators!
